

Bring your people together with Unio

Unio Secure Communications Platform

Unio is a secure unified communications platform that improves leadership visibility and team collaboration by providing users with access to a robust set of voice, video, text, file sharing, and newsfeed features that's secure by world-class encryption.

All the functionality your people need to collaborate

Keep your employees focused and productive with access to all the communications features they need. Make calls, communicate over video, share files, and create groups to keep your people in sync and doing their best work.

Unio's integrated newsfeed gives your managers a powerful tool to share news, updates, and other vital information. Users can like, share, comment, and create specialized groups based on stories shared in a company's newsfeed.

Data privacy isn't an afterthought with Unio

Data privacy is everything today. That's why we've built a platform that prioritizes the safety of the data you share. Unio uses Blackberry Spark's world-class encryption to keep your data safe.

Private conversations stay private on Unio. We don't have access to the decryption keys, meaning your communications stay safe and secure.

We've got a feature for that

Newsfeed

Voice Calls

Video Calls

File Sharing

Single Sign On

Why choose Unio?

Improve leadership visibility

An integrated newsfeed makes it easy for managers to share essential information, track engagement, and streamline discussion.

Enhanced team collaboration

Keep your people connected and in sync with powerful voice, video, file sharing, and messaging functionality.

Coordinate with dedicated groups

Users can create chat groups based on news stories, create private group chats, and more.

Maintain data privacy

Our platform uses Blackberry Spark technology to deliver several layers of encryption. Messages can only be decrypted by participants in a chat—and never by our company.

Make better decisions

Built-in analytics allow your organization to make data-driven decisions based on user behavior.

Keep your people safe and connected wherever they're working.
